

## Fire Drills and Evacuation Training

### Introduction

A fire can strike without warning, causing devastating damage to people, property, and business operations. But with proper preparation, the impact of workplace fires can be drastically reduced—or even prevented altogether.

This Fire Drills and Evacuation Training workshop equips your team with the essential knowledge and hands-on skills to respond swiftly and effectively to fire emergencies. Beyond compliance, this training empowers your workforce to safeguard lives, protect assets, and maintain business continuity.

Fires don't just destroy—they disrupt. From damaged equipment to production delays and tarnished reputations, the consequences can be far-reaching. That's why a proactive approach to fire prevention and response is critical.

This mandatory course ensures your organization complies with the Ministry of Labor's 2012 regulations on occupational safety, health, and fire prevention which requires that at least 40% of employees of each company undergo training. More importantly, it helps your team prevent and manage fire emergencies, minimizing loss and damage.

### Course Objectives

By the end of this workshop, participants will:

1. Develop a cooperative mindset toward fire prevention and safety.
2. Learn to protect lives and property during a fire emergency.
3. Gain practical knowledge and techniques for fire prevention, suppression, and evacuation that can be applied both at work and at home.
4. Ensure your organization complies with the Ministry of Labor's safety and health regulations for fire prevention and control (2012)

### Contents

This workshop combines practical strategies and actionable knowledge, focusing on:

1. Firefighting Plans and Techniques: Master methods to control and extinguish fires in their early stages.
2. Initial Fire Response: Learn how to assign roles and responsibilities for a coordinated response.
3. Fire Prevention Tactics: Explore techniques like fuel elimination and air removal to prevent fires.
4. Evacuation Plans and Procedures: Develop and execute effective evacuation strategies.
5. Search and Rescue Operations: Equip teams with principles for locating and assisting individuals during emergencies.
6. First Aid Basics: Understand key concepts in casualty care and safe transport.
7. Rescue Equipment: Familiarize yourself with tools used for search and rescue operations.

### Instructors

Our instructors bring over a decade of experience in fire control and emergency response. Registered with the Department of Labor Protection and Welfare, they ensure your team receives practical, industry-leading training that meets legal standards.

### Who should attend?

This training is essential for all employees and is legally required for at least 40% of each company's workforce. It's not just about meeting regulations—it's about creating a safer workplace for everyone.

### Learning Format

This workshop combines engaging lectures with realistic, simulated scenarios to provide a well-rounded learning experience. Through hands-on exercises, participants will:

- Practice fire suppression techniques.
- Execute evacuation drills.
- Perform search and rescue operations.

With a learner-centered approach, we ensure each participant gains confidence and competence in fire safety procedures. Each session accommodates up to 40 participants.

### Duration

1 day, 9:00 AM - 4:00 PM (6 hours).
